**Laplanda house Model A**  
 Construction material:  
 House foundation – concrete  
 Frame – aluminum extrusions  
 Roof - aluminum sheeting  
 Walls and ceiling - plywood sections  
 Front - vacuum glass sections

Total floor area - 410sq.ft.  
 Kitchen – 80sq.ft  
 Living room – 160sq.ft  
 Bedroom - 50sq.ft.  
 Bath – 60sq.ft  
 Lobby – 60sq.ft

A

A

Laplanda house is perfect as ADU, that could be developed on any legal lot or parcel if it met the required setbacks and lot coverage limits; local governments should not mandate a minimum lot size for ADUs. So that lot coverage requirements do not preclude ADUs from being built on smaller lots, local governments should review their lot coverage standards to make sure they don't create a barrier to development. Additionally, some jurisdictions allow greater lot coverage for two ADUs.  
 Any legal nonconforming structure (such as a house or outbuilding that doesn't meet current setback requirements) should be allowed to contain, or be converted to, an ADU as long as the development does not increase the nonconformity and it meets building and fire code.
